

Meridian IT Inc. Successfully Achieves ISO/IEC 27001 Certification

Deerfield, Illinois, November 8, 2024 – [Meridian IT Inc.](#), a company that focuses on helping clients with planning, optimizing, and managing technology investments to enable business strategy and growth, today announced its successful completion of its ISO/IEC 27001 examination as of November 8, 2024, and includes the following scopes:

- ISMS supporting people, processes and procedures, and property for the cloud and managed services offerings. This includes Meridian IT's remote workforce servicing customer-owned IT assets at third-party-owned and managed data centers.

The ISO/IEC 27001 certification was conducted by leading compliance assessor A-LIGN, a technology-enabled security and compliance partner trusted by more than 4,000 global organizations to help mitigate cybersecurity risks. A-LIGN is an ISO/IEC 27001 certification body accredited by the ANSI National Accreditation Board (ANAB) and United Kingdom Accreditation Service (UKAS) to perform ISMS certifications.

ISO/IEC 27001 is an information security management system standard published in October 2022 by the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC).

"Congratulations to Meridian IT Inc. for completing their ISO/IEC 27001, a widely recognized signal of trust and security," said Steve Simmons, COO of A-LIGN. "It's great to work with organizations like Meridian IT Inc., who understand the value of expertise in driving an efficient audit and the importance of a high-quality final report."

This certification demonstrates Meridian IT's continued commitment to compliance and ensures clients that the security of their data and information has been addressed, implemented, and properly controlled in all areas of our organization.

About Meridian IT Inc.

Meridian IT provides its clients with Infrastructure as a Service (IaaS), Backup as a Service (BaaS); this includes mProtect and IBM BaaS, Disaster Recovery (DR)/High Availability (HA) options based on varying recovery time objective (RTO)/recovery point objectives (RPO) along with Remote Monitoring and Management (RMM) Services. These offerings are delivered from four geographically diverse data centers, with one located in Oakbrook, Illinois, one in Denver, Colorado, one in Kenosha, Wisconsin, and in Atlanta, Georgia.
